KP1000 SERIES

DIGITAL PROGRAM CONTROLLER

PERFORMANCE SPECIFICATION

CHINO

The KP1000 series is a 96x96mm digital program controller with the indicating accuracy of ±0.1%, the control cycle of approximately 0.1 seconds and maximum 19 program patterns (maximum 19 steps/pattern).
Various functions including the whole program pattern display screen and universal input are provided as standard.

■ FEATURES

●Large easy-to-view 5-digit display

Large easy-to-view 5-digit display
Process value (PV) and set value (SV) are displayed by large easy-to-view 5-digit display indicators. The resolution of 0.1°C is enabled for more than 1000°C.

●Outstanding controllability

Two types of PID algorithms, the position-type PID algorithm and the speed-type PID algorithm, have been installed. You can select the optimum PID algorithm for an object controlled.

●Operability inheriting previous models

The controller inherits the settings screen which has been familiarized for long time. You can set up it with operation which is not different from previous models. The performance of touching-keys has been improved and the outstanding operability has been realized.

●High-precision transmission signal output

The high-precision (0.1% of full scale) analog transmission signal output can be added.

●24V power supply voltage type provided

The power supply voltage 24V (AC/DC) type, which is advantageous in respect of safe, is available.

●Program pattern

Settings of maximum 19 steps per pattern and maximum 19 sets of patterns are enabled. Repeating of a whole program pattern, linking of program patterns and repeating of a specific step in a program pattern are enabled, too.

●Easily identifiable pattern progress display

By selecting the whole program pattern display screen in the operation screen, the shape of whole program pattern and the progressed pattern position are identifiable at a glance.

●Universal input

Various measurement ranges of DC voltage (up to maximum 10V) inputs, DC current input, thermocouple inputs and resistance thermometer inputs have been built-in.

●2 colors of casing available

You can select the color of casing from 2 colors of gray with OA equipment feeling and black with high-class feeling.

●Conforming to international safety standards and European directives (CE)

The controller is in conformity with European directives (CE), and is UL and c-UL approved.

●Conforming to RoHS

The controller is an environmental consideration product which does not contain directed hazardous substances such as lead, etc.
